Mark Snigaroff, Chairman  
Atxam Native Corporation  
Atka, AK 99547

Dear Mr. Snigaroff:

The U.S. Environmental Protection Agency (EPA), through its contractor, Ecology and Environment, Inc., has completed a report summarizing the findings of a visit conducted at the Atka Cape Kudugnak Formerly Used Defense Site (FUDS) in July, 2005. A copy of the report, called a Preliminary Assessment/Site Inspection, is enclosed.

Based on a review of this report, EPA has determined that no further action is warranted at the Atka Cape Kudugnak site. A no further action designation means that no additional steps under the Federal Superfund Program will be taken at the site unless new information warranting further Superfund consideration is discovered. EPA's no further action designation does not relieve your facility from complying with appropriate Alaska state regulations.

In accordance with EPA's decision regarding the tracking of no further action sites, the above named site will be removed from the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) data base and placed in a separate archival data base as a historical record. Archived sites may be returned to the CERCLIS site inventory if new information necessitating further Superfund consideration is discovered.

If you have any questions, please feel free to contact me at (206)553-2782.

Sincerely,

Ken Marcy  
Site Assessment Manager
